Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 6-13 and 15-22, drawn to a top rail and an insulated freight container.

Group II, claim(s) 14, drawn to a method of making a freight container.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relates to a top rail and a freight container made with a top rail and Group II relates to a making a freight container with inner and outer skins and injecting a foam between the inner and outer skins of a floor panel and providing side panels with foam spacing stanchions.

A telephone call was made to Mr. William Evans on May 10, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
